PROFILE

I am a graduate of Frontend Engineer Intensive Bootcamp by Binar Academy. I'm capable to create frontend website using React JS and Next JS, as well as other library that support it. I am interested in technology, blockchain technology in particular, financial technology, and digital technology in general.

EDUCATION

Frontend Engineer Bootcamp, Binar Academy

June 2022 – October 2022

- Create responsive website with HTML, CSS, and Javascript
- Use CSS Framework like Bootstrap & Material UI
- Create CRUD website using React JS and Next JS
- Use Redux for global state management
- Use React Query for server state and Jotai for app state management
- Use CSS Pre-processor / SASS in React JS
- Implement async process while fetching data using Axios
- Present data using chart and table in dashboard
- Improve website performance using Hook in React JS
- Implement clean code principle to make debugging process easier
- Implement SEO approach for search engine optimization
- Create API using Node JS, Express, and My SQL
- Use Git and GitHub as version control system in project collaboration

S1, Universitas Indonesia

September 2012 – January 2017

Bachelor of Public Administration, GPA 3.1 / 4.0

WORK EXPERIENCE

Marketing Director at Propertree.id, Depok

January 2021 – April 2022

- Managed branding campaigns and marketing initiatives at macro & micro level in all 6 subsidiaries.
- Oversaw account budgets, internal billings, and monthly P&L to achieve financial goals.
- Developed business partnerships at all levels.
- Developed strategies to incorporate PR and media to further enhance brand and build market share.
- Increased company revenue through aggressive strategies.
- Spearheaded initiatives to better target business metrics tracking and improve decision-making with real-time data.
- Maintained effective staff and resource utilization rates to balance financial and operational obligations.
